Supermarket freezer in need of less floorspace

The TWIN range, with its double cooling system, features innovative design. It reduces the amount of floor space needed and running costs, whilst increasing reliability. Instead of putting two freezers back-to-back, the TWIN is built as a single unit with no partition.

The result is more space for content with a smaller footprint. The units are ideal for supermarkets or grocery stores with limited space, as they have the same volume in litres as two standard freezers of the same length, despite less depth. The space-saving can be used for more rows of freezer islands or to make more room for customers.

Automatic defrosting and LED lighting are of course standard. The range also features a flexible version, able to switch between cooling and freezing.
