Technical description

Coffee machine with hand lever operation.

- o 3-lt water tank with water level control and possibility to connect the water mains
- o external group head with thermosiphonic circulation
- o 54-lt volumetric pump with adjustable balanced by-pass and 120W motor
- o dual scale pressure gauge
- o electronic boiler temperature control
- o 0,5-lt coffee boiler - 700W
- o 1,2-lt hot water and steam boiler - 1.450W (115V 1.200W)
- o cool touch steam and hot water wands
- o stainless steel frame and body
- o 4-key OLED display: indication of temperature, counters, water supply selection, shot timer, sequential heating
- o Design and components in compliance with CE regulations

Optional accessories:

- o Direct drain kit
- o Wooden knob version
- o Flow adjustment version with pressure gauge

Model	STELLA DUAL
Version	1 GROUP
Dimensions mm.	274x475x379h
Boiler capacity	Coffee 0,55 lt. Steam/ Water 1,2 lt.
Power	Coffee 700W Steam/ Water 1.450W (115V 1.200W)
Voltage	220/240V single phase, 115V single phase
Weight	23 kg
